\* Class Packages include all classes. Kettlebell requires 2 personal sessions or instructor approval with prior KB experience

## CLASS DESCRIPTIONS

Classes are designed for all fitness levels!

### **Boot Camp**

Boot camp is a fun, energizing way to get and stay in shape. Workouts include multi-station circuit training utilizing body weight exercises and equipment, as well as cardio intervals.

### **Core & Balls**

A full body workout utilizing stability balls and medicine balls of various weights and sizes. We'll all focus on your "core". If you don't think you have a core now, after this class, your core will be stronger than ever. Your "core" is a combination of your back and your abdominals. We will work with you to engage these muscles in order to gain better "body awareness" of these important muscle groups. With the appropriate use of the core, your workouts will become much more effective.

### **Kettlebells (KB)**

A kettlebell class works your whole body, using equipment that look like iron cannonballs with handles. This high-energy intense work-out will give you the cardio health and strength that you crave while burning maximum fat and boosting your metabolism! *Pre-requisite: Mandatory 2 one-on-one training sessions with RKC instructor to learn the basics, unless you have prior experience and instructor approval.*

### **TRX**

TRX(TM) suspension training is a revolutionary method of leveraging bodyweight exercises with merely two straps suspended from above...either the wall or the ceiling. This is an excellent exercise program for golfers, the military and anyone interested in low or high impact fitness. We are excited to offer one of the first organized classes in the Washington DC area. Let us teach you how to get the most efficient and effective workouts with the TRX system. Maybe we can even convince you to install the system in your home or office!
